Enhanced Implant Treatment

Presented by Ms. Bridget Marron

Tuesday, September 4, 2012

Wayne, PA

Co-sponsored by:

Dr. Steven Liu

DR. STEVEN LIU INVITES YOU TO

Enhanced Implant Treatment

Course description

This evening program will focus on the products and procedures available to help bring simplicity and reliability to the restorative process. The role of implant design, biomechanics, and abutment selection for achieving optimal results will be discussed. Attendees will recognize that the success of an implant case is a direct function of not only advanced planning, but also the features and benefits of the components used.

Great focus will be placed on the use of patient-specific abutments, which provide practitioners with a means to obtain optimal esthetic results in fewer patient visits, as well as eliminate the complexity associated with traditional implant solutions.

At the completion of this course, participants will be able to:

- Recognize the options available for the replacement of a single tooth predictably, and esthetically.
- Increase profitability, simplify implant treatment protocols and provide optimal esthetic results.
- Integrate patient-specific abutments into any implant protocol.

DENTSPLY Implants is committed to new and innovative knowledge, however sponsorship by DENTSPLY Implants does not necessarily imply endorsement of a particular philosophy, procedure or product.

Featured speaker

Bridget Marron completed her Master Dental Technician (MDT) studies at NYU in October 2011. Ms. Marron graduated from Mt. Ida Junior College with an Associate's Degree in Dental Assisting and has almost 20 years of experience as a chairside dental auxiliary. She was a Certified Dental Auxiliary (CDA) and was also Certified in Radiology. While working at the Boston University Dental School, Ms. Marron was trained as an Expanded Functions Dental Auxiliary (EFDA). This training enabled her to restore patients after dental students prepped the tooth for fillings as well as repair dentures, take preliminary and final impressions and make temporaries. While at the dental school she also taught a dental materials course to the dental assisting students. Ms. Marron is currently a Technical Advisor for DENTSPLY Implants.
