

RESTORATIVE TISSUE LEVEL AND BONE LEVEL IMPLANTS WITH SIMPLICITY AND CONFIDENCE

In Association with Dr. Steven Liu

Thursday, May 1, 2014

Program description

This program will provide an overview of the appropriate indications and prosthetic applications for dental implant treatment. A range of restorative options will be presented, from fully edentulous cases to single- or multiple-tooth implant cases. Topics that will be discussed include treatment planning for esthetic success and the restoration process with corresponding prosthetic component options.

Participants will learn how to place abutments and recognize the different techniques and components required for implant-level and abutment-level impressions. The program will demonstrate the advantages of tissue-level and bone-level restorative platforms for clinicians transitioning into implant dentistry. Participants of this program will understand how to assimilate restorations supported by dental implants into their practice with predictability and confidence.

We will also discuss screw-type and cemented type implant restorations, including indication, contraindication, advantage and disadvantage. Splinting or individual crowns for multiple implant restorations and implant restoration for congenital missing or palatal cleft patients.

Learning objectives

- • Identify restorative components as related to implant dentistry
- • Understand the treatment planning process for single-tooth and multiple-tooth restorations
- • Understand features and benefits of the LOCATOR® Implant Attachment System for implant-supported dentures
- • Place a solid or cementable abutment, and replicate impression procedures
- • Select the appropriate abutment for esthetic restorations

Speaker Dr. Kenneth Kurtz

Date Thursday, May 1, 2014

Time 6:00 pm - 7:00 pm *Registration*
7:00 pm - 9:00 pm *Program*
Dinner will be provided

Location Margaret Kuos
175 E. Lancaster Ave
Wayne, PA 19087
