FOR DENTAL PROFESSIONALS

Achieve Predictable Esthetic Success with Innovations in Dentistry

Program description

This program is designed to provide an overview on the current technological trends in implant dentistry for patients missing single or multiple teeth. Specifically, the dental professional who wants a comprehensive restorative update and desires to be at the cutting edge of the associated technological advances will find this course most beneficial. Attendees will participate in a step-by-step discussion, beginning with dental implant treatment planning to the final restoration, focusing on predictable esthetic success with available restorative options. A portion of the program will be devoted to new technology, featuring products for temporization and cements, light cured preformed temporaries for the molar region, painless tissue management with lasers, 3D imagery for implant treatment planning and implant placement, impression materials, and office crown fabrication for implant dentistry.*

*SLActive™ will be discussed

Program objectives

Upon completion of this program, the participant will be able to:

- Evaluate current technological trends in implant dentistry
- Understand the treatment planning process for single-tooth and multiple-tooth restorations
- Become familiar with the available prosthetic components
- Discuss available temporization and cements for implant dentistry
- Understand how current laser technology can be used for tissue management
- Discuss the use of 3D imagery for implant treatment planning and placement
- Utilize in-office crown fabrication with a solid abutment
- Use impression materials for implant level and abutment level impressions

Speaker

Dr. Steven Liu earned his DMD from University of Pennsylvania, School of Dental Medicine. Dr. Liu pursued post-graduate specialties in Periodontics, Periodontal Prosthesis and fixed Prosthodontics as well as Implant Surgical and Prosthetic training. Dr. Liu

was an assistant professor/clinical educator of Restorative Dentistry in the department of Preventive and Restorative Sciences in University of Pennsylvania. He was also the director of the Implant Dentistry Course. He is the recipient of the 2001, 2002 and 2004 Joseph L. T. Appleton Award for excellence in clinical instruction. His papers have been published in Compendium of Continuing Education in Dentistry, The International Journal of Periodontics & Restorative Dentistry, Journal of Esthetic and Restorative Dentistry, Quintessence International. He is now considered a frequently requested speaker on the local and national scene. Dr. Liu's clinical research activities focus on periodontal prosthesis concepts and implant dentistry, including aesthetic and anatomy concerns for implant surgery and prosthesis. He is a member of the American Dental Association, Pennsylvania Dental Association, American Academy of Periodontology and the Academy of Osseointegration.
